

Radius Adapter

5-171

RoHS
WEEE

Advantages

- Radius adapter simplifies installation for clip-on sealing profiles by creating a radius within 90° inside corners.
- The radius adapter is easily installed and kept in position at the flange of the housing by the clip-on U-part of the sealing profile.
- No welding and grinding of junction plates due to the corner radius.
- Just put the radius adapter into the corner (after the painting process) and fix with the U-shape carrier of the sealing profile.
- Housing covers can be screwed to the frame at low cost using the integrated device for a selftapping screw.

Material

- **Radius adapter:** PA6 30GF, black

Remarks

1. installation surface
